

## ÖBB, Praterstern, Vienna, Austria

Client: ÖBB-Immobilienmanagement

Architect: S.Tillner & A.Willinger, Vienna

Structural Eng.: Vasko & Partner ZT, Vienna

### Execution details

Product: CBCM-S-140

Surface: ~33'500 m<sup>2</sup>

Max. span: 11 m

Slab thickness: 32 to 45 cm

**Cobiax benefits** - large span  
- optimized reaction time of concrete core activation

Concrete reduction: ~2'200 m<sup>3</sup>

Load reduction: ~5'500 to

Reduction of CO<sub>2</sub> emissions: ~660 to

### Special features

Cobiax elements combined with concrete core activation

### Contractor

A.PORR-AG, Vienna

### Year of completion

2010
